Webcasting is a great idea. A link should be provided to those on Council's mailing list and a reminder sent a few days beforehand. Presumably the webcast will be accessible after the event as with the minutes.

Re Meeting Principles No 2: I suggest that the second principle under “ Informed” go further than the current draft and include “best available evidence”. The current draft adjectives used are subjective and are therefore open to a wide range of interpretation. Using best available evidence as a basis to be informed has a much stronger basis and will strengthen the rationale for decision making.
